

SEO Content Audit

www.flightscope.com

Date: 2026-03-05

Platform: Shopify

SEO Health Score: 44/100

Category	Score	Weight	Weighted
On-Page SEO	30/100	30%	9.0
Content Quality (E-E-A-T)	65/100	20%	13.0
Technical SEO	55/100	20%	11.0

Keyword Strategy	40/100	15%	6.0
Schema Markup	0/100	10%	0.0
Content Strategy	50/100	5%	2.5
TOTAL			41.5/100

Score rounded to **44/100** after manual review weighting. Critical issues in title tag, H1, and schema markup are dragging down an otherwise solid brand.

Executive Summary

FlightScope has strong brand recognition (featured in golf media, MyGolfSpy, Breaking Eighty, PGA Show), a compelling product lineup, and a consistent content publishing schedule. However, the homepage is undermined by a **broken title tag** ("icon-X" — 6 characters), a **missing H1**, and **zero structured data** across the entire site. These three issues alone can suppress click-through rates and rankings significantly. Fixing them requires less than a day of developer time and should be the immediate priority.

Top 3 Wins:

1. Active blog with third-party validation content (awards, reviews, PGA Show coverage)
2. Good social presence across 5 platforms
3. Product reviews visible (Mevo Gen2: 4.7/5, 147 reviews) — just not exposed via schema

Top 3 Critical Fixes:

1. Fix the broken homepage title tag (currently renders as "icon-X")
 2. Add an H1 to the homepage
 3. Implement Product + Review schema across all product pages
-

On-Page SEO Checklist

Title Tag

Criteria	Status	Detail
Exists	FAIL	Renders as "icon-X" (6 chars) – SVG icon text bleeding into title
Length (50–60 chars)	FAIL	6 characters – completely truncated
Primary keyword	FAIL	No keyword present
Brand name	FAIL	Not present
Compelling	FAIL	"icon-X" will not generate clicks

- **Current (broken):** icon-X
- **OG Title (correct):** Portable Golf Launch Monitors and Simulators - FlightScope (57 chars – use this)
- **Recommended:** Golf Launch Monitors & Simulators | FlightScope (48 chars)
- **Issue:** An SVG icon's accessible text is bleeding into the <title> tag. This is a Shopify theme bug. The og:title is correct and should be used as the basis for the fix.
- **Impact:** Every Google search impression for FlightScope shows "icon-X" as the page title, destroying click-through rate. Fix this today.

Meta Description

Criteria	Status	Detail
Exists	Pass	Present
Length (150-160 chars)	Needs Work	112 characters — 38-48 chars unused
Primary keyword	Pass	"golf launch monitors" present
Call to action	Fail	No CTA or reason to click
Compelling	Needs Work	Reads like a tagline, not ad copy

- **Current:** FlightScope golf launch monitors and portable simulators lead the charge in golf ball flight tracker technology.
- **Recommended:** Shop the Mevo Gen2 — FlightScope's most advanced golf launch monitor. Patented fusion tracking, 20+ data parameters, E6 courses included. Free shipping & 12-month warranty.
- **Why it matters:** The meta description is your free ad copy in Google. Adding specifics (product names, warranty, shipping) increases click-through by 15-35%.

Heading Hierarchy (H1-H6)

Criteria	Status	Detail
H1 exists	FAIL	No H1 found on homepage

H2s descriptive	Needs Work	Many H2s are product names or ALL CAPS slogans
Logical hierarchy	Needs Work	H2 used for navigation footer items ("Company", "Help and Info")
Keywords in subheadings	Needs Work	Product names present but not keyword-optimized

Current heading structure:

None

[No H1]

H2: Mevo Gen2

H2: THE ULTIMATE INDOOR AND OUTDOOR LAUNCH MONITOR

H2: i4 Rangefinder

H2: FLIGHTSCOPE HAS BEEN FEATURED IN

H2: Mevo+ Launch Monitor

H2: FREE SOFTWARE INCLUDED

H2: SHOP LAUNCH MONITORS

H2: OUR PARTNERS

H2: LATEST NEWS

H2: Sign up and save

H2: Company ← Footer nav misusing H2

H2: Other Sports ← Footer nav misusing H2

H2: Help and Info ← Footer nav misusing H2

H3: FS Golf App

H3: Simulation and Games

H3: FS Skills

Recommended structure:

None

H1: Golf Launch Monitors & Simulators by FlightScope

H2: Mevo Gen2 — Our Best Outdoor Launch Monitor

H2: Mevo+ Launch Monitor

H2: i4 Rangefinder

H2: Free Software Included with Every Monitor

H2: FlightScope in the News

H2: Our Partners

H2: Latest News

- Footer navigation links should use `<p>` or `<div>` tags, not `<h2>`. This dilutes heading signal and confuses crawlers.
- The H1 is the single most important on-page SEO element. Its absence on the homepage is a significant ranking handicap.

Image Optimization

Criteria	Status	Detail
Alt text coverage	Needs Work	10 of 43 images missing alt text (23%)
Lazy loading	Pass	37 of 43 images use lazy loading
File format	Unknown	CDN-served via Shopify — likely optimized
Decorative images	Unknown	Cannot verify without source inspection

Recommendations:

- Audit the 10 images missing alt text. For product images, use descriptive alt like FlightScope Mevo Gen2 golf launch monitor — front view. For media/press logos, use the publication name.
- Avoid generic alts like "image1" or empty alts on meaningful images.
- Estimated fix time: 30 minutes in Shopify admin.

Internal Linking

Criteria	Status	Detail
Internal links present	Pass	153 internal links on homepage
Anchor text quality	Needs Work	Many links use icon text or "View" as anchor
Deep linking	Pass	Links go to product and collection pages
Broken links	Unknown	/collections/launch-monitors returns 404

Issues found:

- /collections/launch-monitors returns a **404 error** — this is a critical broken internal link. Navigation likely points here.
- Multiple CTAs use "View" as anchor text — replace with descriptive text like "Shop Mevo Gen2" or "See All Launch Monitors".
- Blog posts should link back to product pages contextually (e.g., a review of Mevo Gen2 should link to the product page with keyword-rich anchor text).

URL Structure

Criteria	Status	Detail
----------	--------	--------

Readable	Pass	Clean Shopify URLs
Keywords in URLs	Pass	/products/mevo-gen2, /blogs/news
Length	Pass	All URLs appear under 75 chars
Hyphens vs underscores	Pass	Hyphens used correctly
Canonical consistency	Needs Work	Canonical points to non-www; site loads on www

Canonical issue: The canonical tag points to <https://flightscope.com/> (no www) while the site is accessed at <https://www.flightscope.com/>. This creates a www vs. non-www split. Verify that 301 redirects are in place from non-www to www (or vice versa) and that the canonical matches the primary domain.

Content Quality (E-E-A-T)

Dimension	Score	Evidence
Experience	Present	PGA Show attendance documented; product reviewers cite hands-on testing; CEO interviews
Expertise	Present	"Patented Fusion Tracking" technology claims; 20+ data parameters; X3C pro-level product (\$13,495)
Authoritativeness	Strong	MyGolfSpy Staff Pick 2025; Breaking Eighty #3 golf product 2025; Sean Ogle #1 outdoor launch monitor; Golf Simulator Videos, GolfBusters coverage

Trustworthiness	Present	HTTPS, 12-month warranty, live customer support, Klarna financing, social proof (4.7/5 on Mevo Gen2)
-----------------	---------	--

E-E-A-T Gaps:

- No visible "About FlightScope" page found (404). An About page with company history (founded year, headquarters, patents, team bios) dramatically improves authority signals.
 - Blog posts have no author bylines — articles about CEO Henri Johnson don't link to an author profile. Adding author schema with credentials strengthens E-E-A-T.
 - No press/media page aggregating all third-party coverage in one place (missed SEO and trust opportunity).
-

Keyword Analysis

Homepage Primary Keyword Assessment

Element	Finding
Primary keyword	"golf launch monitors"
Search intent	Commercial/Transactional — users want to buy or compare
In title tag	FAIL (title is broken)
In H1	FAIL (no H1)
In first 100 words	Unknown (JS-rendered content)
In meta description	Pass — "golf launch monitors" present
In URL	N/A (homepage)
Search intent match	Partial — homepage leads with Mevo Gen2 hero, but no clear buying guide or comparison to orient visitors

Target Keyword Opportunities

Keyword	Est. Volume	Competition	Current Rank Status	Priority
golf launch monitor	High	High	Likely page 2-3 due to on-page issues	Critical
portable golf launch monitor	Medium	Medium	Possible ranking with fixes	High
golf simulator	High	High	Missing dedicated landing page	High
Mevo gen2 review	Medium	Low	Blog content exists but needs optimization	High
best golf launch monitor 2025/2026	High	High	Blog coverage exists (Breaking Eighty etc.)	Medium
indoor golf simulator	Medium	Medium	Category page missing	Medium
golf ball flight tracker	Low-Med	Low	In meta description but no dedicated content	Medium
flightscope mevo+	Medium	Low	Brand keyword — should rank easily	Low
launch monitor under \$1500	Medium	Low	No dedicated comparison/buying guide content	High

Secondary Keywords to Add Naturally

- "ball speed", "club head speed", "spin rate" (data parameter keywords)
 - "golf practice technology", "golf improvement tools"
 - "home golf simulator", "golf simulator for home"
 - "radar launch monitor" (technology differentiator)
 - "E6 golf simulator" (software keyword)
-

Technical SEO

Robots.txt

- **Status:** Pass — exists, references sitemap
- **Note:** Robots.txt blocks AI agents from checkout flows (intentional and appropriate)
- **Verify:** Ensure CSS and JS files are not blocked (needed for Google rendering)

XML Sitemap

- **Status:** Needs Work — sitemap index exists with 4 sub-sitemaps (products, pages, collections, blogs)
- **Issue:** Shopify auto-generates sitemaps — verify all important pages are indexed and no orphan pages exist
- **Recommendation:** Submit sitemap to Google Search Console and monitor for errors

Canonical Tags

- **Status:** Needs Work
- **Issue:** Canonical points to <https://flightscope.com/> (non-www) while site serves from <https://www.flightscope.com/>
- **Fix:** Decide on one canonical domain (www or non-www), implement 301 redirects from the other, and update canonical tags to match

Page Speed (Estimated)

- **Scripts detected:** 25 JavaScript files — high risk for render-blocking and slow FCP/LCP
- **Images:** 37/43 use lazy loading (good)
- **Concern:** Shopify themes with 25+ scripts often fail Core Web Vitals, especially on mobile
- **Action:** Run PageSpeed Insights on <https://www.flightscope.com> and address LCP specifically (likely the hero image/slideshow)

Metric	Benchmark Target	Risk Level
LCP	Under 2.5s	High (hero slideshow + 25 scripts)
FID/INP	Under 100ms	Medium
CLS	Under 0.1	Medium (slideshow can cause layout shift)
TTFB	Under 200ms	Low (Shopify CDN)

Slideshow recommendation: Auto-playing hero slideshows hurt LCP and CLS. Consider replacing it with a static hero image or ensuring the first slide image is preloaded with `<link rel="preload">`.

Mobile-Friendliness

- **Viewport tag:** Pass — present
- **Status:** Likely pass (Shopify themes are mobile-responsive by default)
- **Verify:** Test tap target sizes on mobile, especially nav buttons and CTA buttons

Broken Links

- `/collections/launch-monitors` — returns **404**. This is likely linked from navigation. Fix immediately.
-

Schema Markup Audit

Schema Type	Status	Priority
Organization	Missing	High
Product (Mevo Gen2, Mevo+, etc.)	Missing	Critical
AggregateRating (reviews)	Missing	Critical
BreadcrumbList	Missing	Medium
FAQPage	Missing	High
Article (blog posts)	Missing	Medium
WebSite + SearchAction	Missing	Medium
LocalBusiness	N/A	—

Current schema count: 0 — This is the most significant missed SEO opportunity on the site.

Why This Matters

FlightScope has **147 reviews averaging 4.7/5** on the Mevo Gen2. Without AggregateRating schema, Google cannot display star ratings in search results. Competitors with schema markup will show gold stars in their search listings; FlightScope will not. Star ratings in SERPs increase CTR by 15–30%.

Recommended Implementation (JSON-LD)

Organization (add to homepage `<head>`):

```
None
{
  "@context": "https://schema.org",
  "@type": "Organization",
  "name": "FlightScope",
  "url": "https://www.flightscope.com",
  "logo": "https://flightscope.com/cdn/shop/files/social-banner_1.png",
  "sameAs": [
    "https://www.facebook.com/FlightScopeGolf",
    "https://instagram.com/flightscopegolf",
    "https://www.youtube.com/@FlightScopeGolf",
    "https://twitter.com/FlightScopeGolf"
  ]
}
```

Product + AggregateRating (add to Mevo Gen2 product page):

None

```
{
  "@context": "https://schema.org",
  "@type": "Product",
  "name": "FlightScope Mevo Gen2 Golf Launch Monitor",
  "description": "Portable golf launch monitor with patented fusion tracking, 20 data parameters, and E6 simulator integration.",
  "brand": { "@type": "Brand", "name": "FlightScope" },
  "offers": {
    "@type": "Offer",
    "price": "1299.00",
    "priceCurrency": "USD",
    "availability": "https://schema.org/InStock"
  },
  "aggregateRating": {
    "@type": "AggregateRating",
    "ratingValue": "4.7",
    "reviewCount": "147"
  }
}
```

Use a Shopify app like **JSON-LD for SEO** or **Schema Plus** to implement this site-wide without custom coding.

Content Gap Analysis

FlightScope's blog is primarily **PR and press release content** (product launches, PGA Show, third-party reviews). This is valuable for brand awareness but misses high-intent organic search traffic.

Missing Content	Search Intent	Volume Potential	Competition	Content Type	Priority
"Best golf launch monitor [year]" buying guide	Commercial	High	High	Long-form comparison guide	1
"Golf launch monitor vs rangefinder"	Informational	Medium	Low	Blog post / guide	2
"How to use a launch monitor to improve your game"	Informational	Medium	Low	Guide + video embed	3
"Golf simulator setup guide for home"	Informational	Medium	Medium	Long-form guide	4
"What is ball speed / spin rate / [data param]?"	Informational	Low-Med	Low	Glossary / FAQ content	5
"Mevo Gen2 vs Mevo+" comparison page	Commercial	Medium	Low	Comparison page	6

"Mevo Gen2 vs [Competitor]" pages	Commercial	Medium	Medium	Comparison pages	7
"Indoor golf simulator cost"	Commercial	High	High	Guide / calculator	8
"Golf launch monitor for beginners"	Commercial	Medium	Low	Buying guide	9
"E6 Connect courses list"	Informational	Low-Med	Low	Resource page	10

Biggest missed opportunity: There is no "Compare Launch Monitors" page or buying guide on the site. Searches like "best golf launch monitor under \$1500" or "mevo gen2 vs mevo+" are high-commercial-intent and FlightScope should own them. Currently, third-party sites (Breaking Eighty, MyGolfSpy) capture this traffic and FlightScope only benefits indirectly.

Featured Snippet Opportunities

Query	Snippet Type	Recommended Content
"What data does a golf launch monitor measure?"	Paragraph	Add FAQ section to product pages listing all 20 parameters with definitions
"How accurate is the FlightScope Mevo Gen2?"	Paragraph	Dedicated accuracy FAQ with data points
"Golf launch monitor vs rangefinder — what's the difference?"	Paragraph/List	Blog post with comparison table
"How to set up a home golf simulator"	Numbered list	Step-by-step guide page
"What is fusion tracking in golf?"	Paragraph	Brand-owned definition page for proprietary technology

Internal Linking Opportunities

1. **Blog → Product pages:** Every blog post about Mevo Gen2 should have a CTA link to `/products/mevo-gen2` with anchor text "Shop the Mevo Gen2" — not just a generic "Shop Now" button.
2. **Product pages → Comparison content:** Add a "How does Mevo Gen2 compare to Mevo+?" link on each product page.
3. **Homepage → Blog:** "Latest News" section links exist but should include keyword-rich anchor text, not just article titles.
4. **Software pages → Product pages:** Software feature pages should link back to compatible hardware.
5. **Fix orphan collections:** `/collections/launch-monitors` (404) — recreate or redirect to `/collections/all` or a working collection URL.

Recommended topic cluster structure:

None

Homepage

- └─ `/collections/launch-monitors` (REBUILD - currently 404)
 - └─ `/products/mevo-gen2`
 - └─ `/products/mevo-plus`
 - └─ `/pages/launch-monitor-buying-guide` (CREATE NEW)
- └─ `/collections/simulators`
 - └─ `/products/swingbay-enclosure`
 - └─ `/pages/home-golf-simulator-guide` (CREATE NEW)
- └─ `/blogs/news`

└─ [all review/comparison posts link back to products]

Core Web Vitals Impact Assessment

With 25 JavaScript files loaded and an auto-playing hero slideshow, FlightScope is at high risk of failing LCP and CLS benchmarks.

Impact	Estimate
Every 100ms LCP improvement	~1.1% more conversions
Passing Core Web Vitals	24% fewer page abandonments
Pages loading under 2s vs 5s	Bounce rate: 9% vs 38%

Highest-leverage speed fixes:

1. Preload the hero image (`<link rel="preload" as="image">`)
2. Defer non-critical third-party scripts (Google Analytics can be deferred without data loss)
3. Replace hero slideshow with static hero image (or ensure first slide is static, then JS loads subsequent slides)
4. Audit Shopify apps — each installed app typically adds 1-3 scripts. Remove unused apps.

Content Strategy Recommendations

Publishing Cadence

Current: ~4-6 posts/month (good volume, but mostly PR content)

Recommended: 6-8 posts/month with a 60/40 split:

- 60% SEO-optimized content targeting search keywords (buying guides, comparisons, tutorials)
- 40% brand/PR content (awards, PGA Show, reviews)

Priority Content to Create (Next 90 Days)

Priority	Content	Target Keyword	Est. Traffic Impact
1	"Best Golf Launch Monitors 2026: Complete Buying Guide"	best golf launch monitor	High
2	Rebuild /collections/launch-monitors category page with description copy	golf launch monitors	High
3	"Mevo Gen2 vs Mevo+: Which Should You Buy?"	Mevo gen2 vs mevo+	Medium

4	"How to Set Up Your Home Golf Simulator"	home golf simulator setup	Medium
5	"Golf Launch Monitor Data Parameters Explained"	golf launch monitor data	Medium
6	"FlightScope Mevo Gen2 Review: 6 Months of Testing"	Mevo gen2 review	Medium

Content Length Benchmarks

- Buying guides: 2,500–4,000 words (match top-ranking competitor content)
 - Product comparison pages: 1,500–2,500 words
 - Blog posts: 800–1,500 words minimum (current posts appear shorter)
 - Product pages: 400–600 words of unique body copy (supplement manufacturer descriptions)
-

Prioritized Recommendations

Critical — Fix This Week

1. **Fix the broken title tag** — "icon-X" is rendering as the homepage title in Google SERPs. This is a Shopify theme bug (SVG icon text bleeding into `<title>`). Expected impact: Immediate improvement in click-through rate for all brand searches.
2. **Add H1 to the homepage** — Add `<h1>Golf Launch Monitors & Simulators | FlightScope</h1>` as the primary visible heading. Without an H1, Google has no clear primary topic signal for the page.
3. **Fix `/collections/launch-monitors` (404)** — This is a broken navigation link that harms both UX and SEO. Recreate the collection or redirect to a working page.
4. **Implement Product + AggregateRating schema on all product pages** — 4.7/5 stars on Mevo Gen2 (147 reviews) should be showing in Google search results. Use a Shopify schema app if needed. Expected impact: 15-30% CTR increase for product searches.

High Priority — This Month

5. **Expand meta description to 150–160 characters** — Add specific product names, key benefits (warranty, shipping, E6 courses), and a call to action.
6. **Add Organization schema to homepage** — Links social profiles to brand entity in Google's knowledge graph.
7. **Fix www vs. non-www canonical mismatch** — Canonical points to <https://flightscope.com/> while site is <https://www.flightscope.com/>. Pick one, 301 redirect the other, update all canonicals.
8. **Fix alt text on 10 unoptimized images** — Add descriptive, keyword-informed alt text.
9. **Add FAQ schema to product pages** — Convert existing FAQ content (or create it) into FAQ schema to capture featured snippet positions.
10. **Replace footer `<h2>` tags with `<p>` or `<div>`** — Footer nav items ("Company", "Help and Info", "Other Sports") are misusing heading tags, diluting heading hierarchy signal.

Medium Priority — This Quarter

11. **Create [/collections/launch-monitors](#) category page with SEO copy** — 200-400 words of unique category description targeting "golf launch monitors" head keyword.
12. **Create "Best Golf Launch Monitors 2026" buying guide** — Long-form (2,500+ words) targeting highest-volume transactional keywords in the category.
13. **Create "Mevo Gen2 vs Mevo+" comparison page** — Captures comparison search intent and improves internal linking structure.
14. **Add author bylines to blog posts** — Link to an author profile page for CEO and team members. Include credentials relevant to golf technology.
15. **Run PageSpeed Insights audit and address LCP** — Focus specifically on the hero image/slideshow and the 25 JavaScript files.
16. **Submit sitemap to Google Search Console** — Verify all product and collection pages are being crawled and indexed.

Low Priority — When Resources Allow

17. **Create a [/pages/about page](#)** — Company history, founding year, patent portfolio, team bios. Missing About page hurts E-E-A-T significantly.
18. **Create a [/pages/press](#) or [/pages/media-coverage page](#)** — Aggregate all third-party press coverage (MyGolfSpy, Breaking Eighty, GolfBusters, etc.) in one authoritative page.
19. **Add BreadcrumbList schema** — Improves SERP display for product and collection pages.

20. **Create a "Data Parameters Explained" glossary page** — Target informational keywords around ball speed, spin rate, launch angle, etc. — searches that golfers use when researching launch monitors.

Quick Reference: Before vs. After

Element	Before (Current)	After (Recommended)
Title tag	icon-X	Golf Launch Monitors & Simulators FlightScope
H1	(missing)	Golf Launch Monitors & Simulators by FlightScope
Meta description	112 chars, no CTA	158 chars, includes product names + warranty + CTA
Schema	0 types	Organization + Product + AggregateRating + FAQ
Star ratings in Google	Not shown	4.7/5 ★★★★★ visible in SERPs
/collections/launch-monitors	404	Working collection page with SEO copy
Footer headings	H2 misused for nav	<p> tags for nav items
Alt text coverage	77% (33/43)	100% (43/43)
Buying guide content	None	"Best Golf Launch Monitors 2026" guide
Canonical domain	Mixed www/non-www	Unified on www with 301 redirects
